Sanitary RTDs and Temperature Transmitters

Introduction

Anderson-Negele's electronic temperature sensors combine our industry proven, all stainless steel construction with modular components. Interchangeable RTD elements, wiring heads, transmitter modules and digital displays can be individually selected. Components can be factory or field assembled in the optimum configuration for any application.

To further facilitate adaptability, our RTD's are offered with the widest selection of sanitary clamp, thermowell and flush-mount fittings; and with sealed cable, quick disconnect, or wiring heads options. Our temperature transmitters are available in analog and HART "SMART" versions. These modules can be factory or field installed in any standard (CT) wiring head or panel mounted remotely from the RTD element allowing for greater flexibility.

New Dual Output options provide two signals in virtually any combinations. Ordering information, technical specifications and dimensional drawings are included herein, or for more information please visit our Web Site at www.anderson-negele.com, or contact your local Authorized Anderson-Negele Distributor.

Authorizations

Features

- Modular components provide maximum configuration flexibility
- Unique element-to-housing design eliminates exposed threads, lowers profile
- All stainless steel construction with O-ring seals for maximum corrosion and moisture protection
- Custom lengths (up to 6") available at no extra charge
- Dual Output Options
- Quick Disconnect Options

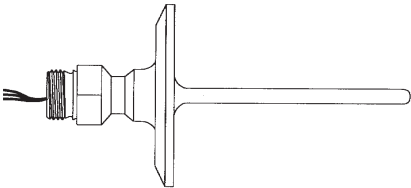

Introduction - Sanitary RTD's

Anderson SA-Series RTD sensors are 100 ohm, 3-wire, DIN standard elements designed for direct immersion in sanitary applications or in any of a wide variety of thermowells. Sensors are available in single or dual element configurations. Single element styles may be specified with factory sealed, shielded cables up to 200 feet in length, or in our unique modular design or with our new water-tight quick disconnect. The modular elements can be mated with either the "mini" head for stand-alone RTD applications or our transmitter head for analog or "SMART" transmitter applications. All dual element sensors are supplied in the modular configuration, now available with dual output wiring heads as well.

All sensors feature completely sealed internals for maximum moisture and vibration resistance. They provide the fastest possible response characteristics due to our unique method of internal element attachment which eliminates all air and non-metallic materials between the element and the process material being monitored. These sensors are constructed entirely of 316L grade stainless steel.

- All stainless steel with no exposed threads
- Compact, low in profile
- Field serviceable - replaceable elements
- Multiple wiring options

Specifications

RTD ELEMENTS

General:	100 ohm, 3-wire* sensors which conform to DIN standards. Single element standard; dual element optional
Coefficient:	.00385 ohms/ohm/Deg. C
Accuracy:	.1% at 0°C (Band 1) Standard
Probe Diameters:	1/4" standard for sanitary clamp styles (1"-4") single or dual element. Other diameters available for thermowell installation
Response:	2.5 to 3 seconds for 63% step change
Span:	400°F (221°C) maximum
Low End:	-50°F (-45°C) minimum
High End:	350°F (176°C) maximum
Material:	316 "L" Stainless Steel wettable parts
Surface Finish:	25 micro-inch Ra 32 micro-inch Ra (thermowell fittings)
Fitting Styles:	All standard sanitary clamp styles, including fractional clamps and mini thermowell styles; Refer to ordering matrix for details

* RTD's with quick disconnect are configured for 4-wire connection to minimize output errors from connection resistance.

WRITING HEADS

General:	The wiring heads are designed to accept any type of RTD element, but offers the cleanest package when coupled with Anderson "no exposed thread" RTD's, which provide an O-ring seal against the housing.
Material:	304 Stainless Steel
Surface Finish:	32 micro-inch Ra max.
Dimensions:	Transmitter: 3.15" O.D. X 2.75" L
Mini RTD:	2.0" O.D. X 2.3 L
Penetrations:	(2) at 1/2" - 14 NPT female; (1) centered in bottom plate; (1) in side beneath cap rim.
Cable Connections:	Standard NEMA 4X "Hubbell" style cable "grip", or Optional Quick Disconnect with Field Wireable Connector
Ratings:	NEMA 4X; IP66

Introduction - Sanitary RTD's

Any single element RTD can be used with our 4-20 mA transmitters. Our standard 4-20mA transmitter module can be mounted in our transmitter wiring head or in a remote panel. The module not only provides an accurate signal (0.1% of calibrated span) but is also completely sealed in urethane for protection against vibration and moisture. An optional digital display can be mounted in the cap providing local indication of temperature, signal level, or percent output. This option can be factory installed or added in the field. The housing can be oriented vertically or horizontally to simplify wiring and optimize viewing angle. Any of the above may be specified in single (standard) or dual (any combination) outputs. The result is a competitively priced transmitter which is:

- Modular - field replaceable/upgradeable components.
- All stainless steel with no exposed threads
- Compact, low in profile

Specifications

ANALOG TRANSMITTER MODULE (STANDARD OF "MINI")

Input:	3-wire, 100 ohm, DIN standard curve (385 coefficient)
Output:	2-wire, 4-20 mA analog
Power Supply:	12 to 40 Volts d.c. loop power required
Accuracy:	0.1% of calibrated span, linearized
Minimum Span:	50°F or C
Maximum Span:	300°F, 180°C
Minimum Low End:	0°F or C
Maximum Low End:	100°F or C
Minimum High End:	50°F or C
Maximum High End:	350°F, 180°C*
Wiring Connections:	Screw terminals with #3 screws
Isolation:	Non-isolated
Burn-Out:	Upscale (factory standard) downscale (consult factory)
Zero Adjustment:	"Pot" adjustable to $\pm 25^\circ\text{F}$ ($\pm 15^\circ\text{C}$) typical
Span Adjustment:	"Pot" adjustable over a 25°F (15°C) range minimum

SMART TRANSMITTER MODULE

Input:	3-wire, 100 ohm, DIN standard (.00385 ohms/ohm/°C)
Output:	4-20 mA, linear with temperature; Digital output signal superimposed on 4-20mA signal; "HART" compliant
Isolation:	Input/Output isolated to 500V rms (707V p-p)
Accuracy:	$\pm 0.1\%$ of upper range limit (URL); includes non-linearity, and hysteresis
Stability:	0.1°C per 6 months
Minimum Span:	10:1 turndown (23°C)
Maximum Span:	230°C
Maximum Range:	-50 to 180°C
Power Required:	14-40 VDC external loop power (unregulated)
Power Supply Effect:	Less than 0.005% of span per Volt
Max. Loop Resistance:	(Supply Voltage - 14) X 40 = Ohms

AGENCY APPROVALS

Electromagnetic Compatibility (EMC):	CE Compliant (for optional LCD only, display accuracy de-rated up to 2% in 150 - 180 MHz and 230 - 350MHz, 10V/M RF Field).
CRN :	0H19789.5C
Hazardous Locations:	Meets UL requirements* for Class 1, Div. 1&2; Groups A-D for intrinsically safe apparatus when installed with barrier as required in control drawing provided. *Only for "Mini" or "Smart"
Ambient Limits:	-18 to 50°C
Ambient Effects:	$\pm 0.13^\circ\text{C}$ per 28°C temperature change
Storage Temperature:	-40 to 65°C
Humidity:	0-100% RH
Vibration Effects:	Withstands 2g at 10-60 Hz
Failure Mode:	Field selectable, High or Low
Warranty:	Two Years

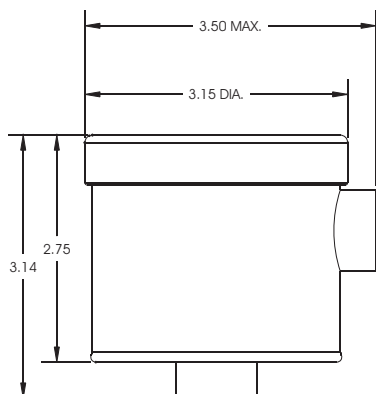

DISPLAY MODULE

General:	The display module provides a local display of temperature (°F or °C) or output value (milliamps or percent). It mounts in the cap and is powered by the loop power supply. It is designed to be easily added to any unit in the field or can be specified initially with any unit or transmitter.
Digits:	3-1/2 digits
Digit Size:	.5" High
Type:	LCD
Mounting:	Integral to cap; field replaceable/upgradeable
Units of Display:	4-20mA; 0-100%; Degrees C; Degrees F (0-199.9°F max) factory set, or 0-300° F.
Accuracy:	$\pm 0.2\%$ of scale
Loop Resistance:	Adds less than 250 ohms

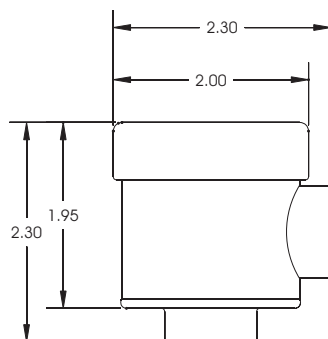

*250°F, 121°C FOR FITTING CODE 088-000 AND 089-000

Ordering Examples

- Sanitary Series RTD, single element, 50' sealed cable with strain relief, 1.5" Tri-Clamp® fitting.
Model #: SA110040370110
- Sanitary Series RTD, dual element, with wiring head, 2" Tri-Clamp® fitting.
Model #'s: SA520050490000 (RTD)
CT320000001100 (wiring head)
- Analog (4-20mA) temperature transmitter, 0-150°C range, 0-100% display, with pre-wired RTD, with thermowell fitting for 6" insertion, 1/4" diameter, 1/2" NPT. Horizontal mount wiring head.
Model #'s: SA510840890000 (RTD)
CT13073C022100 (wiring head with transmitter)
- Smart (4-20mA with HART) temperature transmitter, field programmable range, no display, with pre-wired RTD, with 1.5" Tri-Clamp® fitting. Vertical mount wiring head with 25' pre-wired cable.
Model #'s: SA510040370000 (RTD)
CT14999P001105 (wiring head with transmitter)
